DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1) Claims 1-6, are rejected under 35 U.S.C. 103(a) as being unpatentable over Honkalampi (6,158,333).

Claim 1: Honkalampi discloses a fiber web 80 passing through an extended nip formed by a shoe roll 10 positioned on the lower side in relation to the fiber web 80, and counter roll 22 positioned on the upper side of the web. The web is subjected to a linear load of the rolls. The counter roll 22 is arranged on a movable lever 95 having pivot point 96 and a hydraulic piston arrangement 94 for providing a force acting on roll 22 through the pivot point. As shown in Figure 1, a substantially perpendicular relation exists between the pivot arm and the linear load (col. 4, line 43 to col. 5, line 17, and Figure 1). The structural arrangement and operational conditions of Honkalampi are the same as in the present invention, therefore it would have been obvious to one skilled in the art at the time the invention was made, that a minimization of vibration would occur in the arrangement of Honkalampi.

Claims 2-3: the claimed linear load is disclosed (col. 13, lines 2-7).

Art Unit: 1731

Claims 4-6: the hydraulic piston arrangement 94 provides for movement through the pivot point making minor changes to the perpendicular angle relationship between the lever and the linear load.
